

Goldline

Choice of Champions

THE PODIUM

The Podium program was conceived with the purpose of equipping every level of curler with footwear that would optimize performance and comfort. With development input from TEAM MARTIN, the top end Podium Gold was introduced to the market in 2009 and has been an overwhelming success, being quickly adopted by elite curlers at club, national and international levels.

Performance and Comfort Considerations:

Slider Thickness - slider speed increases with the thickness of the Teflon™, 1/4" being the thickest and the fastest. Every curler should be looking for optimal slide with a minimum of leg thrust. For most curlers excessive leg thrust results in instability. Experienced curlers who are accustomed to the ice and do not have stability concerns usually prefer a fast slider, whereas less experienced curlers usually want to balance speed with stability. It is important to keep in mind that inexperienced curlers generally have low leg thrust and if equipped with an excessively slow slider, the result will be an unsatisfactory delivery.

GOLD

Model Specific Features:

- Top grain leather upper, both inside and out.
- Reinforced leather patch on the inner heel to absorb wear.
- Lace cover to reduce drag on the trailing foot.
- 1/4" hinged slider.

Available in right hand or left hand

Sizing: Women's 5 to 10 (full and half sizes); Men's 7 to 12 (full and half sizes), plus 13, 14, 15

(901) Men's, (902) Women's \$249

Hinged Front Slider - sliders that have a thickness of 5/32" or greater tend to be rigid, creating a limiting force against any degree of heel elevation during delivery. Likewise the rigidity results in constant heel rubbing during walking. By splitting the front from the back slider and "hinging" the front slider, the negative effect of rigidity is eliminated on Podium shoes.

SILVER Men's

Model Specific Features:

- Leather upper.
- Silver accents on men's model.
- Available in REGULAR and WIDE fit.
- 5/32" hinged slider.

Available in right hand or left hand

Sizing: Men's 7 to 12 (full and half sizes), plus 13, 14, 15

Regular: (916) Men's \$179

Wide: (932) Men's \$179

PODIUM SERIES

2010 marks the introduction of the Silver and Bronze models, aimed respectively at the intermediate and entry level curler. Both these models have been developed without compromise. The outsole is the same as used on the Gold model, the uppers are leather, even the Bronze model has a 3/32" slider - the minimum a new curler should start with.

Lateral Stability - during delivery the natural tendency is for weight to be shifted to the outside of the sliding foot, reducing the surface area from which balance and stability are achieved. The outsole on the Podium series is expressly moulded to incorporate a lateral stabilizer in the ball of the foot. The result is even distribution of weight across the slider, a wider balance platform and enhanced stability.

Warmth - insulation throughout the upper and air cushioning in the sole ensure warmth on all Podium models.

Comfort and Fit - careful attention to materials and design afford slipper-like comfort from the first time Podium shoes are worn. Further, the Silver model is available in both REGULAR and WIDE fit. And, unlike most curling shoes, ladies Podiums are built on specific women's moulds.

Quality - most shoe production relies upon high volume automated assembly lines. Only 'high end' shoes that demand careful attention to quality and details are still produced in 'handmade' factories. Such is the case with the entire Podium Series. Every shoe is produced under the watchful eye of master craftsmen.

SILVER Ladies

Model Specific Features:

- Leather upper.
- Magenta accents on women's model.
- Available in REGULAR and WIDE fit.
- 5/32" hinged slider.

Available in right hand or left hand

Sizing: Women's 5 to 10 (full and half sizes)

Regular: (917) **Women's \$179**

Wide: (935) **Women's \$179**

BRONZE

Model Specific Features:

- Leather upper
- 3/32" flat slider
- Available with grippers on both feet (double gripper model)
- Non-hinged slider.

Available in right hand or left hand

Sizing: Women's 5 to 10 (full and half sizes); Men's 7 to 12 (full and half sizes), plus 13, 14, 15

Regular: (906) **Men's**, (912) **Women's \$139**

Double Gripper: (913) **Men's**, (915) **Women's \$139**

SHOES

SHOT

Suede leather uppers, insulation throughout, tasteful design and great price make SHOT the best value on the market today.

"A Little Understanding Goes a Long Way."

Weight - lighter brushes are easier to push and therefore more effective. The main variable in terms of weight is the handle. There are basically four types of handles available. From the heaviest to the lightest, these are wood, fibreglass, composite (fibreglass and carbon fiber), and pure carbon fiber. Given today's advanced materials, wood and 100% fibreglass (over 400 g) are simply too heavy. Goldline offers three options: two composites and one carbon fiber. Each is differentiated by weight and price. The following table shows the handle weight of each:

	Carbon Fiber	GLi	Fiberlite
1"	170 g	220 g	270 g
1 1/8"	200 g	250 g	300 g

The GLi and Fiberlite both use composite handles, however, the GLi has a higher carbon fiber content, making it lighter.

Synthetic vs. Hair - testing has shown hair and synthetic heads to be equally effective in regular conditions. Some feel hair is more effective in frosty conditions. Such conditions exist at televised events where equipment, camera lights and crowds create a warm environment and ultimately frost on the ice. Such conditions seldom exist in club play. Hair is a natural fiber subject to breaking, and the effect of a rock running over a hair can be profound. Goldline hair heads are pure horse hair and the hair is set with epoxy to minimize hair loss. Hair heads are available only on Goldline's stationary head brushes.

CARBON FIBER

The right equipment can give you a competitive edge. Our "feather" shaft allows you to sweep faster, harder and more effectively, with less effort. The head features a full sliding bar for optimal stability, 360° rotation for maximum effectiveness, synthetic oval pad for focused weight transfer and simple pad replacement so optimal performance can be maintained. Also available with stationary hair head.

Carbon Fiber - 360° Rotating Head with Synthetic Pad \$149

Sport Band

"We had a number of people fall on the ice, myself included. Head injuries and liability are serious matters and we felt we needed to address them. The club purchased the Sport Bands and we make them available to all curlers."

*Paul Williams
President, Chingcousy Curling Club*

The issue of sports-related concussions has recently become a major issue. Once considered of almost no consequence, concussions are now seen as having potentially long term effects, some of these are linked to dementia and Alzheimer's disease. Though the focus has been on contact sports, sports such as curling and figure skating are not immune to head injury and concussion. Virtually all participants in these non-contact sports can relate stories of serious falls and concussions involving themselves or others.

Introduced in 2009, The Sport Band has been designed to reduce the possibility of concussion in the event of a fall on the back of the head. The Sport Band has

been tested by the Canadian Standards Association and is the only device of its kind to pass standards developed for hockey helmets. Without exception curlers testify that the Sport Band served its purpose in preventing serious injury.

The Goldline Sport Band is lightweight, also includes a removable and washable sweatband and internal elastic expansion to facilitate fit.

(500) Sport Band \$39
